

FOR IMMEDIATE RELEASE

**PERC AWARDED 2009 DBIA WESTERN PACIFIC REGION
BEST PROJECT-WATER**

NEWPORT BEACH, CALIFORNIA, May 26, 2009 – Pacific Environmental Resources Corp. (“PERC”) was presented the 2009 Design-Build Institute of America (DBIA) Western Pacific Region’s “Best Project – Water” Regional Award at an awards banquet at the Newport Beach Marriott Hotel on Thursday, May 22. The award honors projects that “exemplify the principles of interdisciplinary teamwork, innovation and problem solving that characterize design-build delivery” and was given to PERC in recognition of their Surprise Planning Area 3 (SPA 3) water recycling facility in Surprise, Arizona.

The SPA 3 water recycling facility was recognized for its unique design whereby 1.8 million gallons of wastewater can be processed each day on an overall facility footprint of less than one acre of land. The dramatically reduced total footprint was achieved by constructing the contemporarily designed and aesthetically attractive operations building directly above the process tanks, establishing complete odor and noise control.

Surprise is one of Arizona’s fastest growing cities and was struggling to provide the necessary infrastructure to support this growth. PERC’s utilization of the design-build-operate delivery approach created a fast-track solution for the City, developers and home builders. As a result, they contracted with PERC to build four new facilities, one of which is SPA 3.

To learn more about this project, please visit PERC’s website: www.percwater.com.

About PERC

PERC is a water recycling company who designs, builds, operates and manages water recycling facilities throughout the United States. PERC has designed more than 55 facilities – 20 of which they have designed, built and operated. The company guarantees water of the highest quality and assumes the risks associated with water recycling. PERC is headquartered in Costa Mesa, CA. See www.percwater.com for more information.
