Santa Paula Water Recycling Facility Achieves Final Completion

Santa Paula, California, March 8, 2010 – The Santa Paula Water Recycling Facility has received its formal Notice of Final Completion from the City of Santa Paula. Santa Paula Water, the partnership of PERC Water and Alinda Capital Partners, received the notification from the City on February 15, 2011 in response to their October 12, 2010 submission package that demonstrated they had met the agreed upon requirements.

“Our team is pleased the City of Santa Paula has formally recognized the facility’s completion,” said Brian Cullen, President of PERC Water. “From the early conceptual stage of the project, we worked closely with the City to ensure the facility not only met the State mandated requirements and brought the City back into compliance, but that it sets a new standard for water infrastructure in technological innovation, fiscal responsibility, and energy efficiency.”

The facility was designed, permitted, built and commissioned in 23 months, and on May 13, 2010, seven months heads of schedule, the facility began treating the entirety of the City’s wastewater. The recycled water it produced this past January is on average 60% cleaner than the Regional Water Quality Control Board permit requires.

In addition, the City saved on average more than \$10,000 a month in the first seven months of operation as a result of PERC Water’s investment in energy saving technology. The facility is considered one of the most energy-efficient and cost-effective of its kind in the world.

###

PERC Water Corporation is a water recycling company that designs, builds, operates and manages water recycling facilities throughout the United States. They have designed more than 55 facilities – 20 of which they have designed, built and operated. The company guarantees water of the highest quality and assumes the risks associated with water recycling. PERC Water is headquartered in Costa Mesa, California. www.percwater.com.

Alinda Capital Partners LLC is the world’s largest independent infrastructure firm, with over \$7 billion in equity commitments to infrastructure investments. Alinda’s infrastructure companies serve over 125 million customers annually in more than 250 cities. The companies operate in 18 states in the United States as well as in Canada, the United Kingdom, the Netherlands and Italy, and employ more than 15,000 people. Alinda’s investors are predominantly pension funds for public sector and private sector workers. These institutions seek steady investments over the long term, matching their pension liabilities and include some of the largest institutional investors in the world. www.alinda.com
